Tech plan

General Criteria
- ● Design user interface
- ● Front End
    - ○ Login Screen
        - ■ User registration
            - ● Initial survey (demographics, what they are looking for)
        - ■ Log in screen
            - ● Option to login with facebook or phone number
        - ■ Forgot password
    - ○ App functionality
        - ■ Notifications
        - ■ Settings page
        - ■ User profile page
        - ■ Profiles for users to interact with
- ● Back End
    - ○ Database to store user information (MySQL)
    - ○ Code to make the application functional

Tentative Tech Plan with deadlines for Good Side
- ● Design Interface - **March 7th**
    - ○ Create outline of what we want our interface to look like
- ● Login functionality & to create a database to store information - **March 14**
    - ○ Create MySQL accounts for database to store the backend
    - ○ Create actual login screens and login functionality
- ● Survey - **March 29**
    - ○ Create survey functionality for people to use when signing up for an account
- ● Reviewing Functionality - **April 12**
    - ○ Create interface (based off of design) and backend to display user profiles
- ● Matching Algorithm - **April 19**
    - ○ Create algorithm to match people to profiles
- ● Profile Report - **May 2**
    - ○ Profile report that shows user statistics on their profile and general statistics
